

Get Clean Healthy Eyelids

Your eyelids play a critical part in the overall health of your eyes. Over 85% of dry eye originates from the eyelids. All the dirt, oil, dead skin, bacteria, and mites that accumulate over time on your eyelids (akin to tartar on your teeth) can lead to redness, tearing, burning, swollen eyelids, and fluctuating vision.

ZEST® is a QUICK AND PAINLESS in-office deep cleansing procedure performed at your eye doctor's office that uses patented Zokrex™ technology with activated natural okra polysaccharide complexes to gently and effectively clear scurf and residue from your eyelids.

The MiboThermoflo is a GENTLE and EFFICIENT treatment that massages your eyelids to stimulate blood flow and liquefy the hardened oils that have become solidified. The meibomian glands will secrete thinner and clearer oils which will allow for a healthier tear film.

- ✓ Clinically effective against Demodex
- ✓ Natural, Okra-based formulation

- ✓ Outperforms warm compresses
- ✓ No topical anesthetics
